**Project Title:** Groundwater management and gender inequalities in India

**Project Number:** IMURA0938

**Monash Main Supervisor**
- Name: Prof. Marc Parlange
- Email: lan.Cartwright@monash.edu

**Monash Co-supervisor(s)**
- Name: NA

**Monash Head of Dept/Centre**
- Name: Professor

**Monash Department:** Civil Engineering

**Monash ADGR**
- Name: Professor Emanuele Viterbo
- Email: Emanuele.Viterbo@monash.edu

**IITB Main Supervisor**
- Name: Dr. Pennan Chinnasamy,
- Email: P.Chinnasamy@iitb.ac.in

**IITB Co-supervisor(s)**
- Name: NA

**IITB Head of Dept**
- Name: Prof. Anand B Rao,
- Email: Head.ctara@iitb.ac.in

**IITB Department:** Centre for Technology Alternatives or Rural Areas - CTARA

**Research Clusters:**

<table>
<thead>
<tr>
<th>Highlight which of the Academy’s CLUSTERS this project will address?</th>
<th>(Please nominate JUST one. For more information, see <a href="http://www.iitbmonash.org">www.iitbmonash.org</a>)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Material Science/Engineering (including Nano, Metallurgy)</td>
</tr>
<tr>
<td>2</td>
<td>Energy, Green Chem, Chemistry, Catalysis, Reaction Eng</td>
</tr>
<tr>
<td>3</td>
<td>Math, CFD, Modelling, Manufacturing</td>
</tr>
<tr>
<td>4</td>
<td>CSE, IT, Optimisation, Data, Sensors, Systems, Signal Processing, Control</td>
</tr>
<tr>
<td>5</td>
<td>Earth Sciences and Civil Engineering (Geo, Water, Climate)</td>
</tr>
<tr>
<td>6</td>
<td>Bio, Stem Cells, Bio Chem, Pharma, Food</td>
</tr>
<tr>
<td>7</td>
<td>Semi-Conductors, Optics, Photonics, Networks, Telecom, Power Eng</td>
</tr>
<tr>
<td>8</td>
<td>HSS, Design, Management</td>
</tr>
</tbody>
</table>

The research problem

Climate Change can have drastic impacts on the hydrological cycle (erratic rainfall, floods and droughts). India is a rural economy driven country, and with most population under rural livelihood, it is of utmost important to understand the climate change impacts on agricultural productivity and water sustainability. In such circumstances, groundwater has been a saviour to address water extremes. While Groundwater extraction in India is ever increasing, the resource is not equally shared among the population and the women gender are the most affected.

Therefore there is a need to understand equity of groundwater and how it affects marginalized people, especially women.

Project aims

Primary objective of the project is to understand the groundwater budget and withdrawal mechanisms in rural regions, where observation data is limited. Secondary objectives include deriving methodologies that can alleviate the groundwater induced stress on women.

Expected outcomes

• Sensitization of ongoing agriculture water stress and climate change impacts
• Assessment of land use and land cover change impact on hydrological parameters
• Sustainable groundwater water use practices
• Realistic scenarios for groundwater management

How will the project address the Goals of the above Themes?

The project will primarily focus on WATER theme, wherein holistic water management practices will be researched. Also, novel information on site specific surface water groundwater interactions will be studied and researched in this project, which are related to WATER theme. This project will also use GIS and computer simulation models for data processing and simulation of surface water and groundwater interactions. This requires high level of simulation expertise which will be under the SIMULATION theme.

Capabilities and Degrees Required

• The student should have a Masters degree that has a hydrological focus (e.g. water resources management, civil engineering, hydro informatics, etc.)
• Experience in field work, remote sensing GIS and computer simulation models.
• Programming skills/data management skills to manage large datasets
• Excellent writing skills

Potential Collaborators

Please visit the IITB website [www.iitb.ac.in](http://www.iitb.ac.in) OR Monash Website [www.monash.edu](http://www.monash.edu) to highlight some potential collaborators that would be best suited for the area of research you are intending to float.

Prof. Marc Parlange has been identified as the potential research collaborator. He has extensive experience on groundwater modelling. A Skype meeting has been conducted and details of the collaboration discussed.
Select up to (4) keywords from the Academy’s approved keyword list (available at http://www.iitbmonash.org/becoming-a-research-supervisor/) relating to this project to make it easier for the students to apply.

Water resources management, Climate change; Modelling and simulation; Hydrogeology.
