

An Indian-Australian research partnership

Project Title: **Emergency response mobility system for fire fighting in high density city situations**

Project Number ID00715

Monash Main Supervisor
 (Name, Email Id, Phone)

Dr Robbie Napper
 Robbie.napper@monash.edu

Full name, Email

Monash Co-supervisor(s)
 (Name, Email Id, Phone)

Dr Selby Coxon
 Selby.coxon@monash.edu

Monash Head of Dept/Centre (Name,Email)

Prof. Lisa Grocott
 Lisa.grocott@monash.edu

Full name, email

Monash Department:

Design

Monash ADRT
 (Name,Email)

Prof. Arthur De Bono
 Arthur.debono@monash.edu

Full name, email

IITB Main Supervisor
 (Name, Email Id, Phone)

Dr. Sugandh Malhotra
 sugandh@iitb.ac.in

Full name, Email

IITB Co-supervisor(s)
 (Name, Email Id, Phone)

Prof. Sreekumar

Full name, Email

IITB Head of Dept
 (Name, Email, Phone)

Full name, email

IITB Department:

IDC

Research Clusters:

Research Themes:

Highlight which of the Academy's CLUSTERS this project will address? (Please nominate JUST <u>one</u> . For more information, see www.iitbmonash.org)		Highlight which of the Academy's Theme(s) this project will address? (Feel free to nominate more than one. For more information, see www.iitbmonash.org)	
1	Material Science/Engineering (including Nano, Metallurgy)	1	Advanced computational engineering, simulation and manufacture
2	Energy, Green Chem, Chemistry, Catalysis, Reaction Eng	2	Infrastructure Engineering
3	Math, CFD, Modelling, Manufacturing	3	Clean Energy
4	CSE, IT, Optimisation, Data, Sensors, Systems, Signal Processing, Control	4	Water
5	Earth Sciences and Civil Engineering (Geo, Water, Climate)	5	Nanotechnology
6	Bio, Stem Cells, Bio Chem, Pharma, Food	6	Biotechnology and Stem Cell Research
7	Semi-Conductors, Optics, Photonics, Networks, Telecomm, Power Eng	7	Humanities and social sciences
8	HSS, Design , Management		

The research problem

Define the problem

India has forty-six cities with over 1 million inhabitants. The complex built environment and variety of dwellings and environments make finding, providing first aid and evacuating patients difficult. The emergency vehicles (often termed as Quick Response Vehicles) must reach the disaster struck regions as early as possible. The worsening traffic conditions and dense urban fabric of modern cities pose serious challenges to the quick reach of large size fire extinguisher engines. The role and importance of well equipped emergency response is vital and well recognized. The compact emergency response system for high density city situations is a research area has a potential for sizeable impact through incorporation of newer technologies and being more efficient. There is a dire need to study and research both at systems as well as vehicle level to find newer and more practical smaller, agile, efficient emergency mobility solutions with regards to the densely populated urban spaces.

Project aims

Define the aims of the project

Identify, investigate, research, design and build an effective mobility system for densely populated narrow streetscape of large cities; build or simulate the system; demonstrate effectiveness and articulate lessons learnt.

Expected outcomes

Highlight the expected outcomes of the project

It is the aspiration of the project that the outcomes will form a body of work outlining how emergency mobility systems for urban metropolitan cities can benefit from a design methodology and what improved emergency response vehicle system could look like. Examples of such output may include:

- Research: system and product level thinking to realize potential solutions for an effective comprehensive solution for reaching and deploying high density city situations during an emergency
- Create: identify and build specifications for a compact, modular and scalable system
- Simulate/Test: testing through simulation; build mockup for simulated field testing and register actual users' feedbacks;
- Promoting Awareness: Spreading awareness among the neighborhood communities to adopt better practices for ensuring quicker emergency response vehicle deployment

How will the project address the Goals of the above Themes?

Describe how the project will address the goals of one or more of the 6 Themes listed above.

These project goals will capture within the research the themes of (8) Design and in a supportive role (1) Engineering, (2) Manufacturing.

Capabilities and Degrees Required

List the ideal set of capabilities that a student should have for this project. Feel free to be as specific or as general as you like. These capabilities will be input into the online application form and students who opt for this project will be required to show that they can demonstrate these capabilities.

A background in Industrial Design, preferably a Masters or high level Bachelor degree in accordance with the eligibility regulations. The candidate's portfolio should demonstrate adequate rigor and inclination towards problem identification and solution finding through research.

Potential Collaborators

Please visit the IITB website www.iitb.ac.in OR Monash Website www.monash.edu to highlight some potential collaborators that would be best suited for the area of research you are intending to float.

Select up to **(4)** keywords from the Academy's approved keyword list (**available at www.iitbmonash.org**) relating to this project to make it easier for the students to apply.
